

作品編號 000405

作者 - 黃俊融 張家維 蔡懷恩

作品名稱

2040年全球犯罪率趨近於零- 母愛補充劑成功抑制暴力本能

IN 2040, GLOBAL CRIME RATES APPROACHED ZERO AS MATERNAL AFFECTION SUPPLEMENTS SUCCESSFULLY SUPPRESSED VIOLENT INSTINCTS.

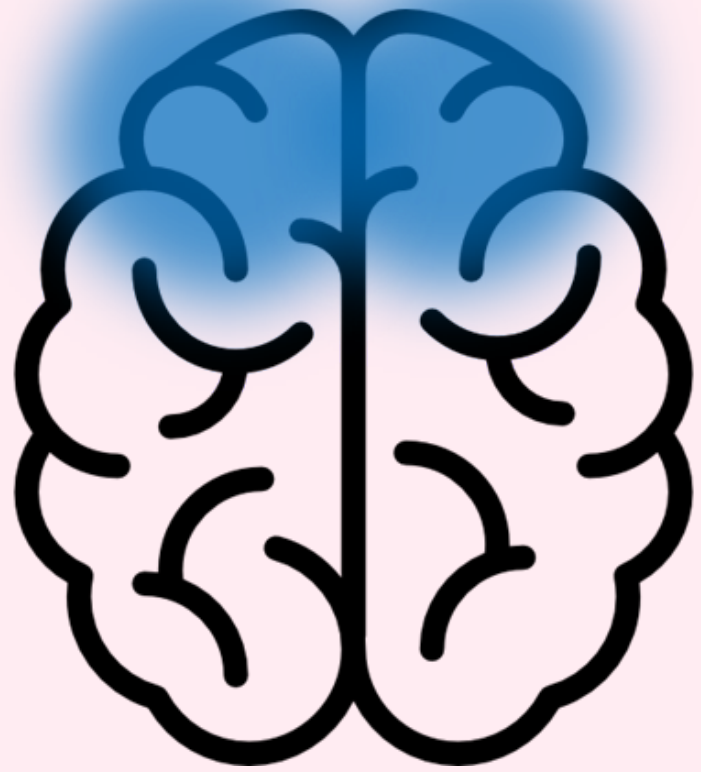

作品概述

70%的連環犯罪者有杏仁核結構較小等先天性問題，且與母親關係惡劣，母愛即是治癒缺陷的最後一塊拼圖

 **PREVENTION**

母愛使前額葉良好發展

Maternal love fosters the proper development of the frontal lobe.

前額葉掌管思考、控制行動、溝通、控制情緒等，因此前額葉皮層損傷、管理情緒的杏仁核結構較小，會使人在犯案時相對冷靜，衍伸出犯罪行為，而醫學證實母愛能有效改善上述問題。The frontal lobe handles thinking, impulse control, communication, and emotions. So, damage to the frontal lobe or smaller amygdala structures, which handle emotions, can result in a calm demeanor during criminal activities, contributing to criminal behavior. Medical evidence supports that maternal love can help address these issues effectively.

母愛補充劑

母愛補充劑是結合抗精神藥物以及抗焦慮藥物，如好度、安祈平等能夠穿越血腦壁障的藥物，讓施打者的腦部能夠保持正常。The Maternal Affection Supplement combines antipsychotic and anti-anxiety medications such as Haloperidol Decanoate and ANZEPAM, and it includes drugs capable of crossing the blood-brain barrier. This ensures that the recipient's brain can maintain normal functioning.

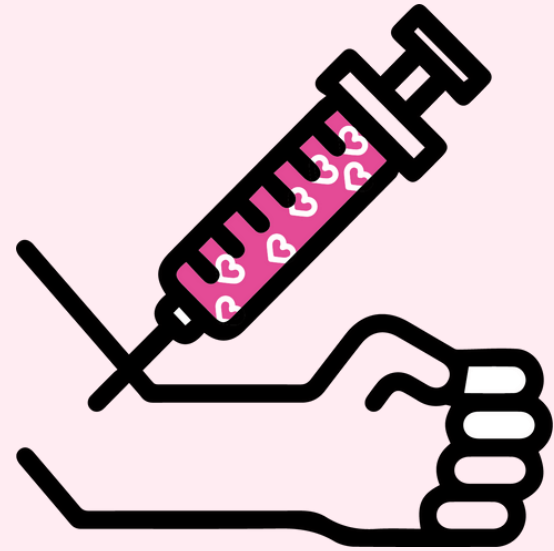

母愛補充劑的優勢在於它對個體成長的積極影響，這項革命性技術幫助缺乏母愛的潛在犯罪者擁有健康的心靈，各種形式的暴力事件大幅減少。

The Maternal Affection Supplement's advantage is its positive impact on personal growth. This groundbreaking technology helps individuals without maternal love develop a healthy mindset, leading to a notable decrease in different types of violent incidents.

使用成效 Effect

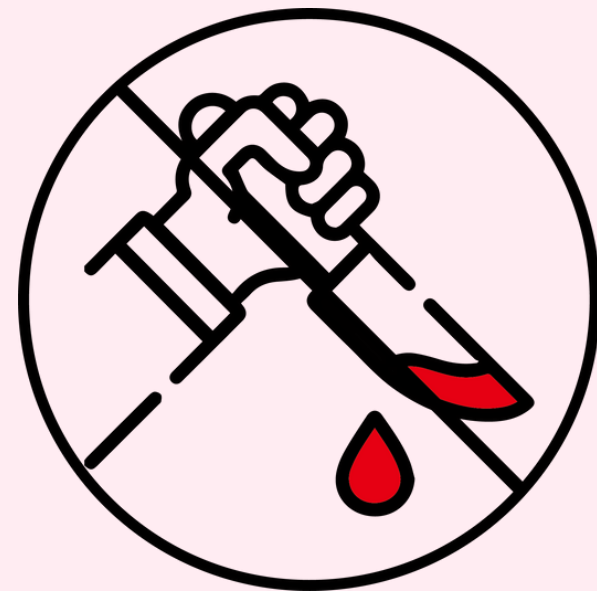

STEP1 前額葉皮層損傷之潛在犯罪者
Potential offenders with damage to the frontal lobe cortex.

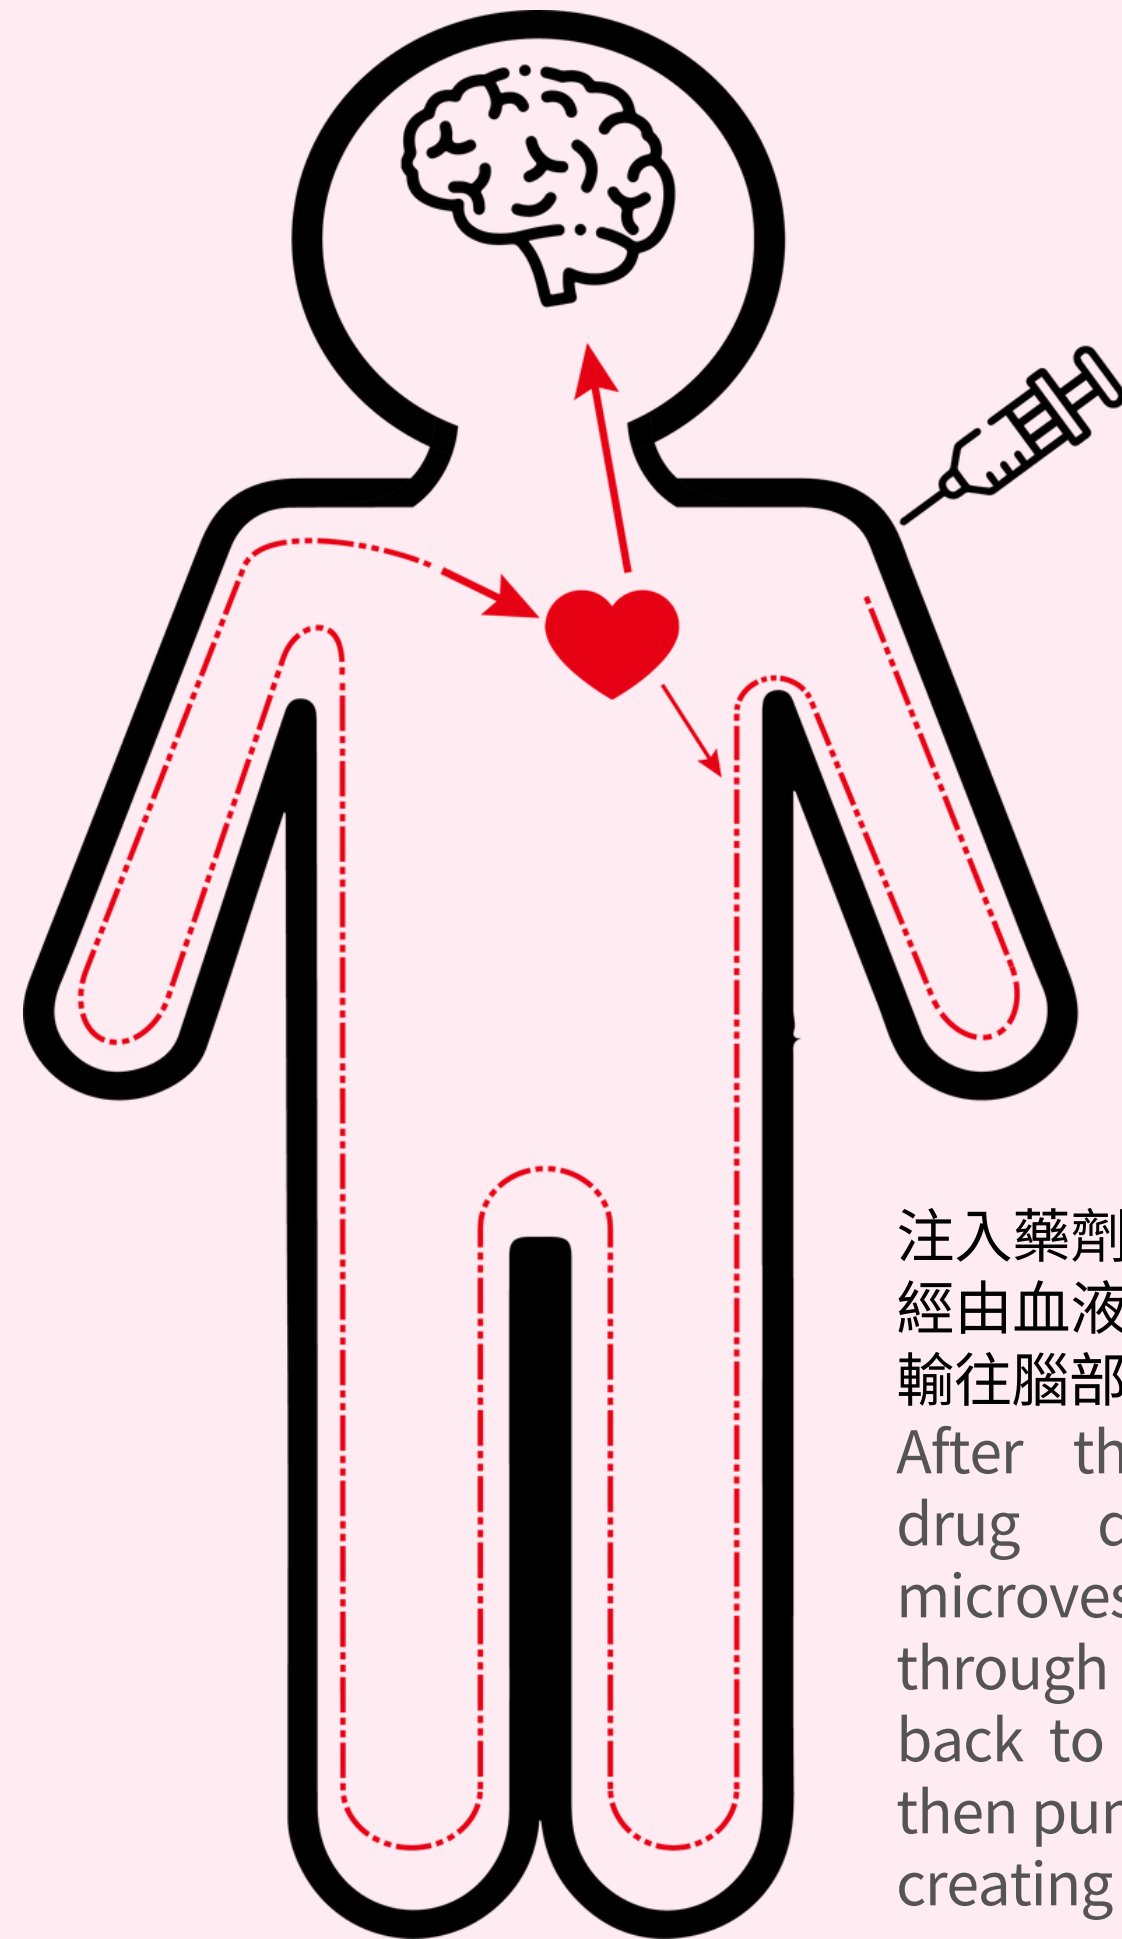

STEP2 母愛補充劑注入手臂
The Maternal Affection Supplement is given with a shot in the arm.

STEP3 傷口被治癒，前額葉恢復健康
The frontal lobe is restored to health.

STEP4 犯罪率大幅減少
Crime rates have significantly decreased.

注入藥劑後在微血管擴散，經由血液循環回到心臟，再輸往腦部形成循環。
After the injection, the drug diffuses through microvessels, circulates through the bloodstream back to the heart, and is then pumped to the brain, creating a circulation.
