

政府推行碳平權政策，讓有意識的消費也可以賺錢！ 001440

The government is implementing a carbon equity policy, allowing conscious consumers to also make money!

A CARBON EQUITY POLICY

為避免全球溫度上升1.5度的不可逆情況，政府決議對碳排進行總量管制，每個人都會被分配到相同的碳排放權，避免過度消費而碳排過多。

In order to prevent the irreversible consequences of global temperature rise exceeding 1.5 degrees, the government has decided to implement a total carbon emissions control policy. Each individual will be allocated an equal carbon emissions quota to prevent excessive consumption and overemission of carbon.

A CARBON EQUITY POLICY

具體來說，消費時會被扣除碳權，如果超支時，就需要到交易所購買，否則會坐牢懲罰，但如果還有剩餘的碳權則可以賣出賺錢，同時，每一季用碳最少的人，還可以獲得特別獎勵。

Specifically, carbon allowance will be deducted when consuming, and if one exceeds their allocated quota, they will need to purchase additional allowance from a trading exchange. Failure to do so may result in penalties, including imprisonment. However, individuals with surplus carbon allowance can sell them to earn money. Additionally, those who use the least carbon allowance each quarter will receive special rewards.

A CARBON EQUITY POLICY

專家樂見此一政策，認為可同時解決世界兩大議題，有效緩減氣候變遷，避免全球生物及人的生存危機，同時可以減緩貧富差距。

Experts applaud this policy, as it is seen as a solution to address two major global issues simultaneously: effectively mitigating climate change, thereby averting a global crisis for both ecosystems and human survival, while also helping to reduce income inequality.
