

作品名稱 Title

台灣率先導入性別光譜數位身分證 突破傳統性別定義

Taiwan takes the lead in introducing a gender spectrum digital ID,
breaking away from traditional gender definitions.

作者 | 翁佳瑋

合作之創作團隊 | Dot Design 點睛設計

作品編號 | No.000995

作品概述 Overview

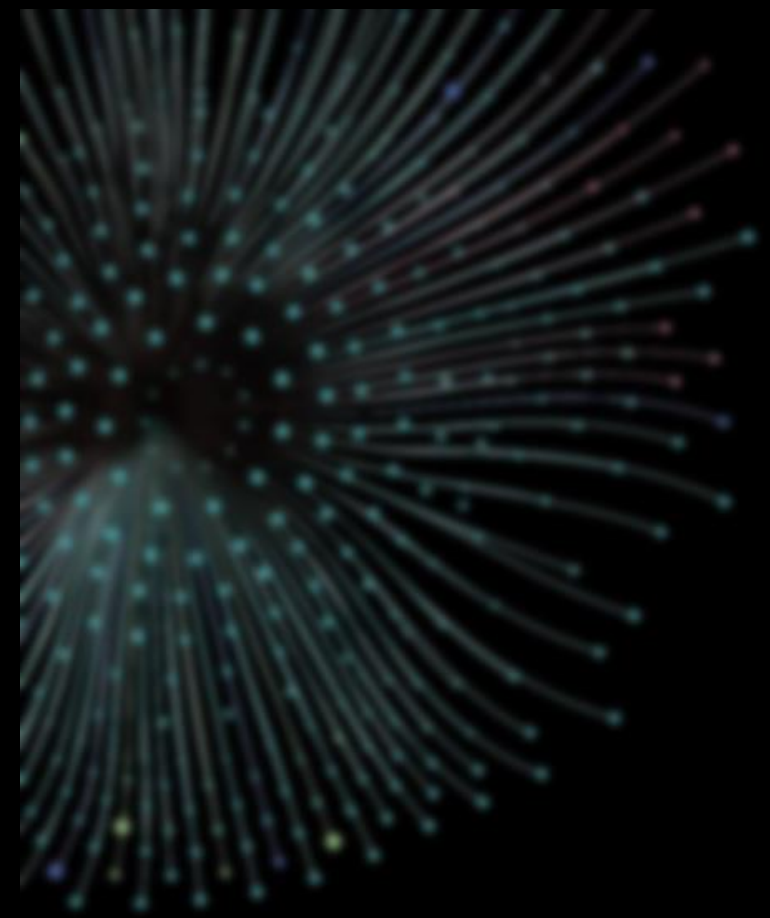

2040年，台灣數位身分證導入性別光譜，允許個人在身分證上選擇最貼近自己性別認同的符號或符號組合...

In 2040, Taiwan introduced a digital ID system that incorporates a gender spectrum, allowing individuals to choose symbols or symbol combinations on their ID cards that best represent their gender identity...

突破傳統性別定義

**我的想像是
2040年數位身分證上能夠
自由展現最真實的自我!**

My vision is that in 2040,
the digital ID will allow individuals to freely express themselves!

小松

從束縛到自由： 渴望身分證能展現 自我意識

#生理男

#個性陰柔

#性別認同偏女

#穿著女裝更自在

Thon is a cisgender male whose gender identity leans towards female. She feels more comfortable dressing in a way that resembles that of a girl, but this has also brought some challenges for her...

os. 性別是流動的啊
為什麼要用生理性別
框住我...

這個人好奇怪

你看看他男兒身

還穿女裝真的是異類...

#社會對話不足歧見甚深

#不了解性別認同概念

Due to the lack of societal discourse, there is a limited understanding of gender identity concepts in society, and deep-seated prejudices persist. This often results in her being ridiculed by the public...

啊你性別欄是男的怎麼打扮像女？

所以我要叫你小松先生？

#身分證以生理性別為依據

Even government personnel, when providing services, often address 'her' as 'Mr.' based on the biological sex indicated on her current ID card. They sometimes even mock her attire, which frequently makes her feel uncomfortable and embarrassed...

#根據性別認同 可以給予更細膩的服務

She believes that defining a person by gender identity could provide a warmer experience for individuals who have had similar encounters.

我不想要改變生理特徵
不過想要在身分證上
自信展現我的性別認同!

I don't want to change my physical state, but I want to
confidently express my gender identity on my ID card!

卡面個資過多，
我為什麼要讓人家
知道那麼多資訊？

還我隱私權

Preserve My Privacy Rights

我要選擇自主權

I Want the Right to Choose Disclosure

明明就是定義自己的證件，
卻無法自由展現個人意志，
我想要有更多的欄位選擇，
讓大家清楚認識我是誰！

兩難的政府擱置爭議
僅放置最無異議的資訊
數位身分證沒有辦法透過科技
有更突破、更便民的應用！

The government's decision to shelve the dispute has prevented the digital ID from breaking through the current situation and harnessing technology to provide more convenient applications for the public...

問題的轉機：賦權自由抉擇

A Turning Point in the Issue: Empowering Freedom of Choice

啊！那何不在政府規定的欄位外，
新增自訂欄位的選項，提供民眾自主選擇的權利，
可以選擇要額外揭露什麼資訊、對誰揭露，
這樣想要展現的民眾能夠呈現最真實的自我，
注重隱私的民眾也不會被迫揭露了~

Privacy is undoubtedly crucial, but it should not strip away people's freedom to decide whether to disclose their personal information.

政府規定欄位

小松

男

自訂揭露欄位

性別認同：偏女 家庭：*****

教育程度：***** MBTI人格：ISTP

數位身分證上個資三區塊

The Three Data Blocks on the Digital ID Card

1. 政府規定資訊 Government Mandates Necessary Information Disclosure

必要個資 # 更改須審核 # 讀取輸入讀取碼

政府規定資訊更改須經政府機關審核，輸入身分證統號後六碼（讀取碼）即可檢視讀取：包含中文姓名、外文姓名（由民眾選擇）、出生日期、統一編號、婚姻狀態（有/無）、製證日期及應換領日期。

The government mandates the placement of essential personal information, requires input of a reading code, and changes must undergo approval. This includes details such as name, date of birth, and ID number.

民國127年07月05日
新北市|初發

2. 自訂揭露資訊 Citizens' Freedom to Choose Information Disclosure # 民眾選擇揭露 # 隱私自訂 # 溯源機制 # 更改冷卻期

給予民眾選擇更改資訊的權利，以呈現最貼近真實狀況的自我，並且可以根據個別資訊選擇分享對象（例如：朋友、公開或只限本人）：包含家庭、寵物、教育程度、職業、星座、MBTI人格、生理性別（可以性別認同取代）、**性別認同光譜**等...

Individuals can freely disclose and update this information to reflect their most authentic selves in real-time. Information privacy is customizable, and there is a traceability mechanism and a change cooling-off period for any data modifications. This includes educational level, personality traits, biological gender (replaceable with gender identity), and the gender identity spectrum.

3. 隱私加密資訊 Personal Confidential Information

自訂憑證密碼 # 個人同意 / 政府授權才有讀取權

需要自訂憑證密碼，服務提供者（金融、法院及醫院等公務）須向政府機關申請授權，始得讀取加密區資料，部分資訊得以於指定情境讓指定人士取得：包含病歷、器捐意願、隱疾、生物特徵、聯絡方式、財務情況、遺囑、指定代理人等...

Custom certificate passwords are required, and service providers (such as financial institutions, courts, and hospitals) must apply to the government for authorization to access encrypted data. Some information may be made accessible to designated individuals in specified contexts. This includes medical records, organ donation preferences, biometric data, financial status, wills, and designated proxies.

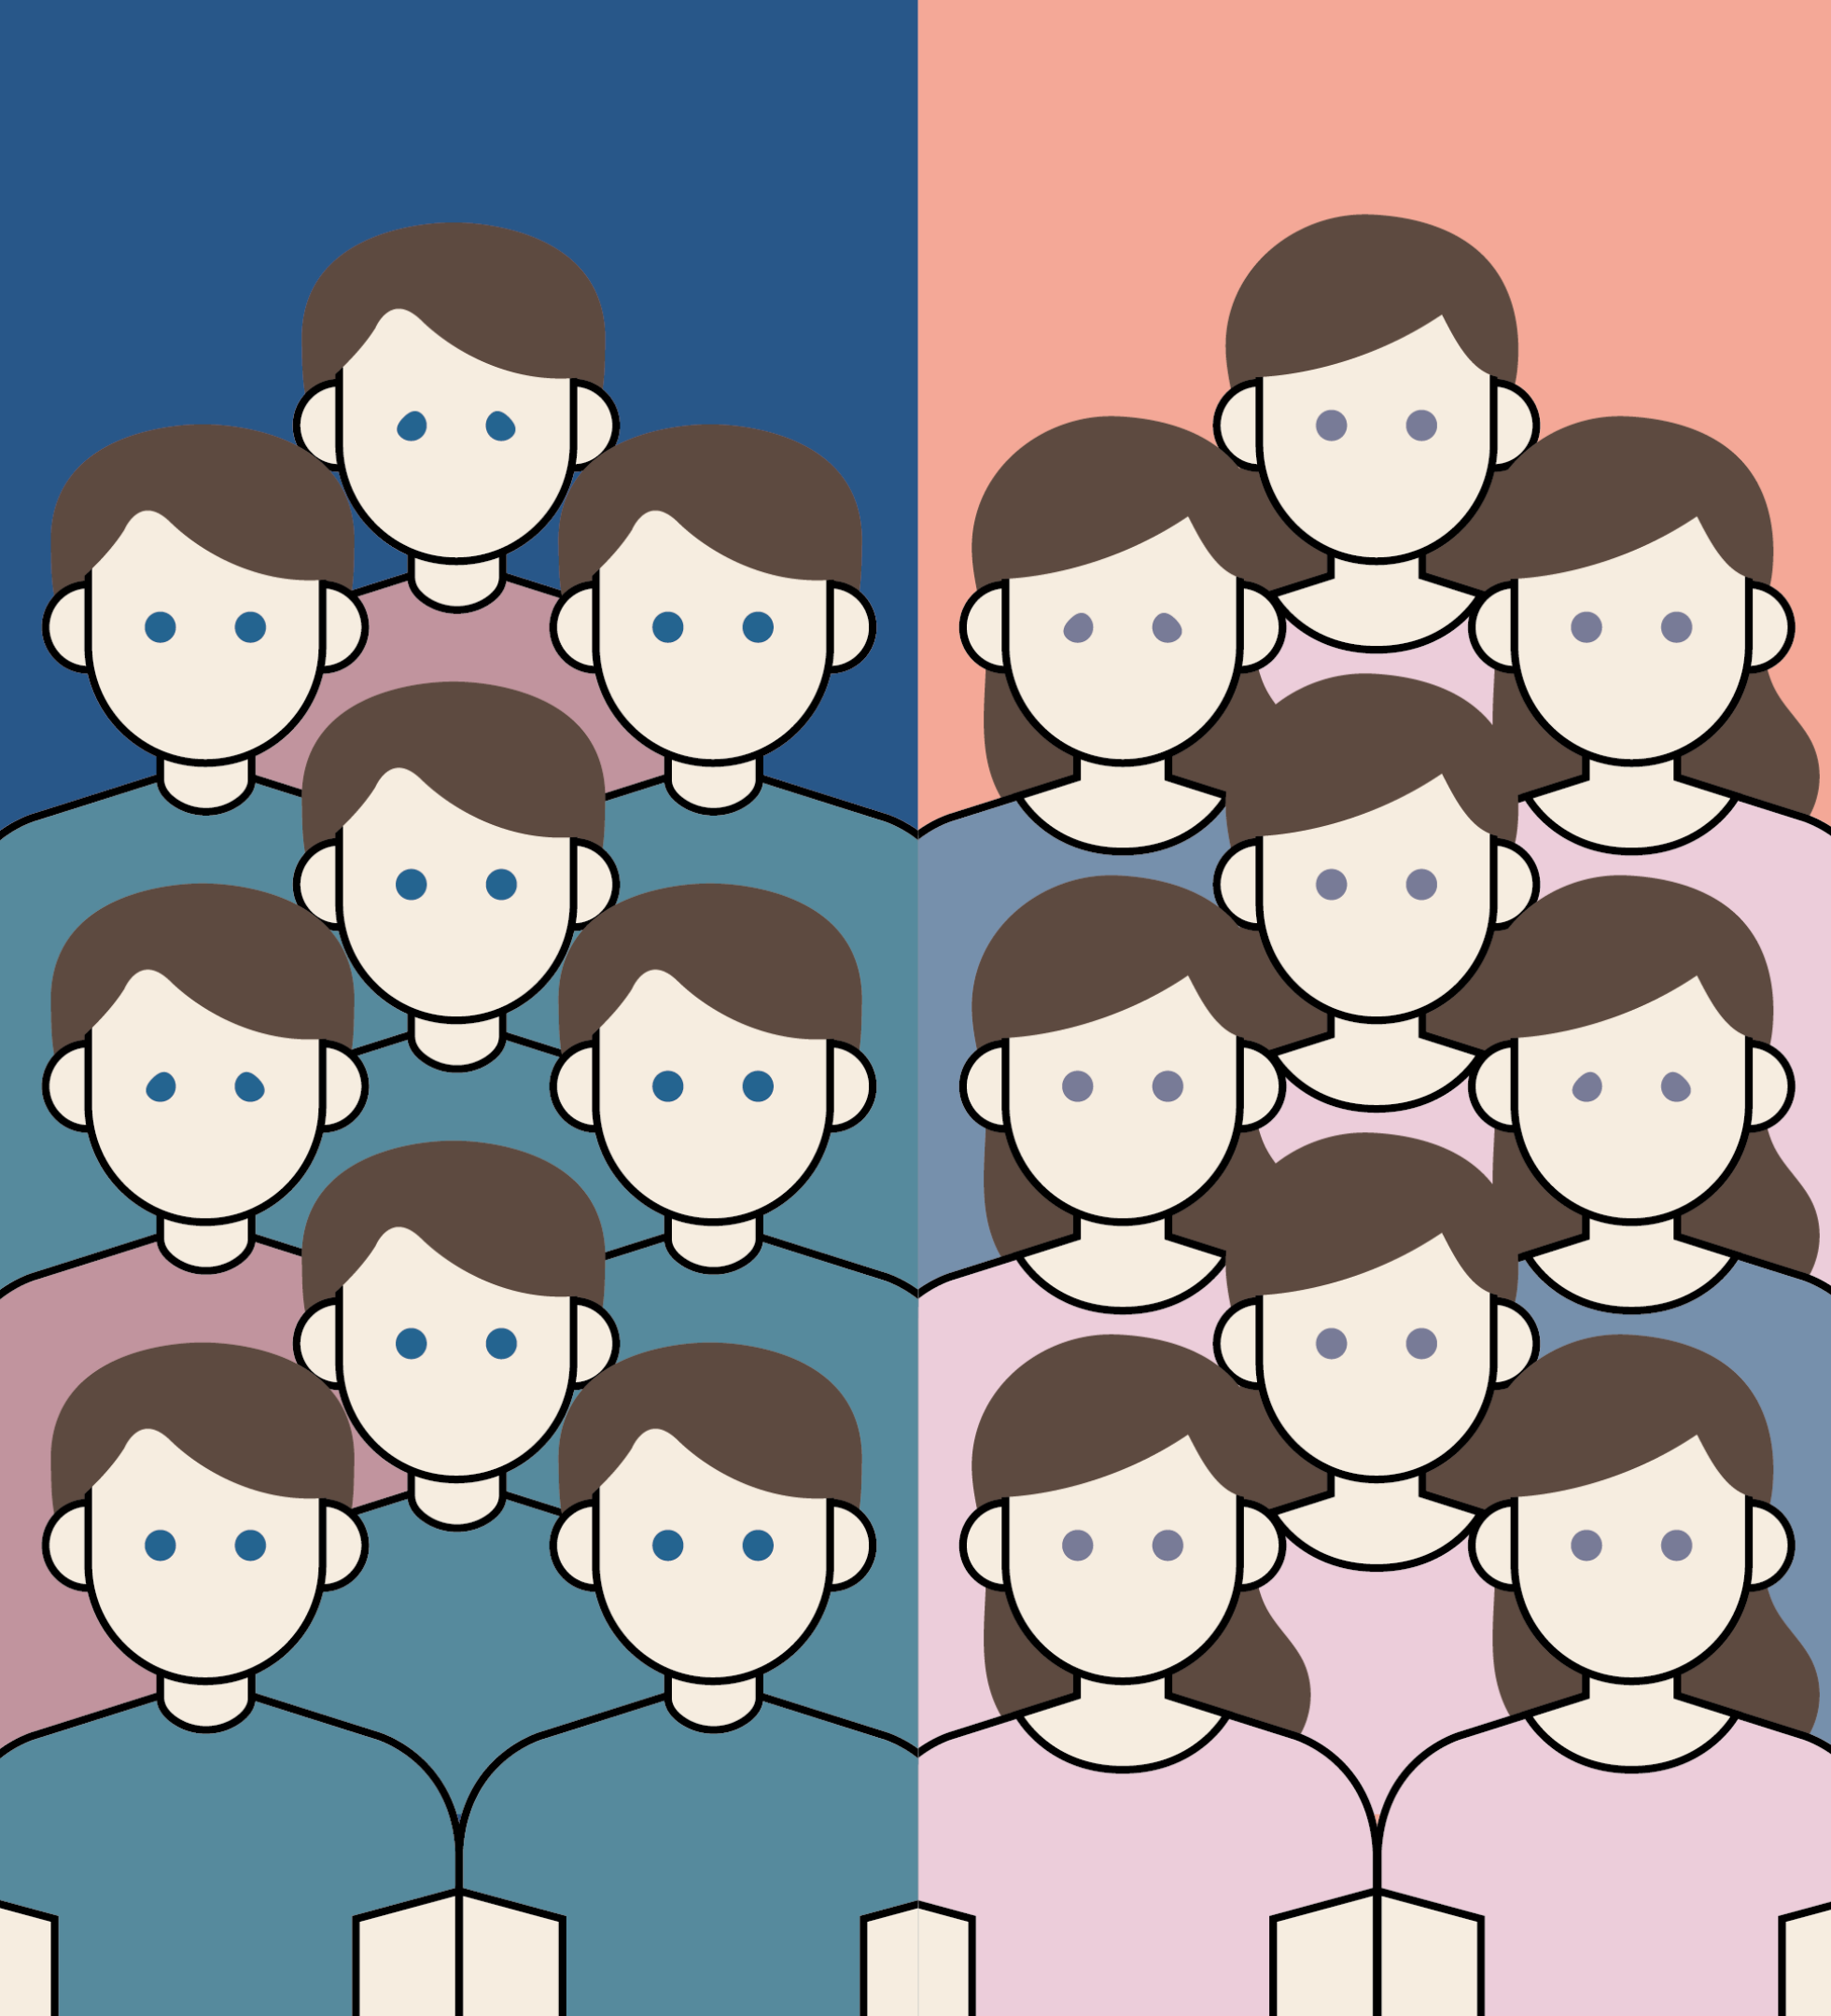

其中 性別光譜欄位的出現

將打破傳統性別定義，這項重要政策引發社會關注，
被譽為邁向多元平權重要里程碑！
打造包容友善、多元共融的社會氛圍！

The gender identity field is presented in a spectrum format, breaking away from traditional gender definitions. This significant policy has garnered societal attention and is hailed as a crucial milestone towards diversity and equality. It aims to create an inclusive, friendly, and diverse social atmosphere!

**生理性別就夠了吧？
多放一個 性別光譜欄位 有什麼用？**

Is the distinction of biological gender not sufficient?
What's the purpose of adding a gender identity field?

目前全世界大概

有80億人口

卻被2種生理性別給束縛

The current global population is approximately 8 billion people,
yet it is confined by the binary concept of two genders,
male and female.

「性別不是選擇題，

"Gender is not a multiple-choice question;

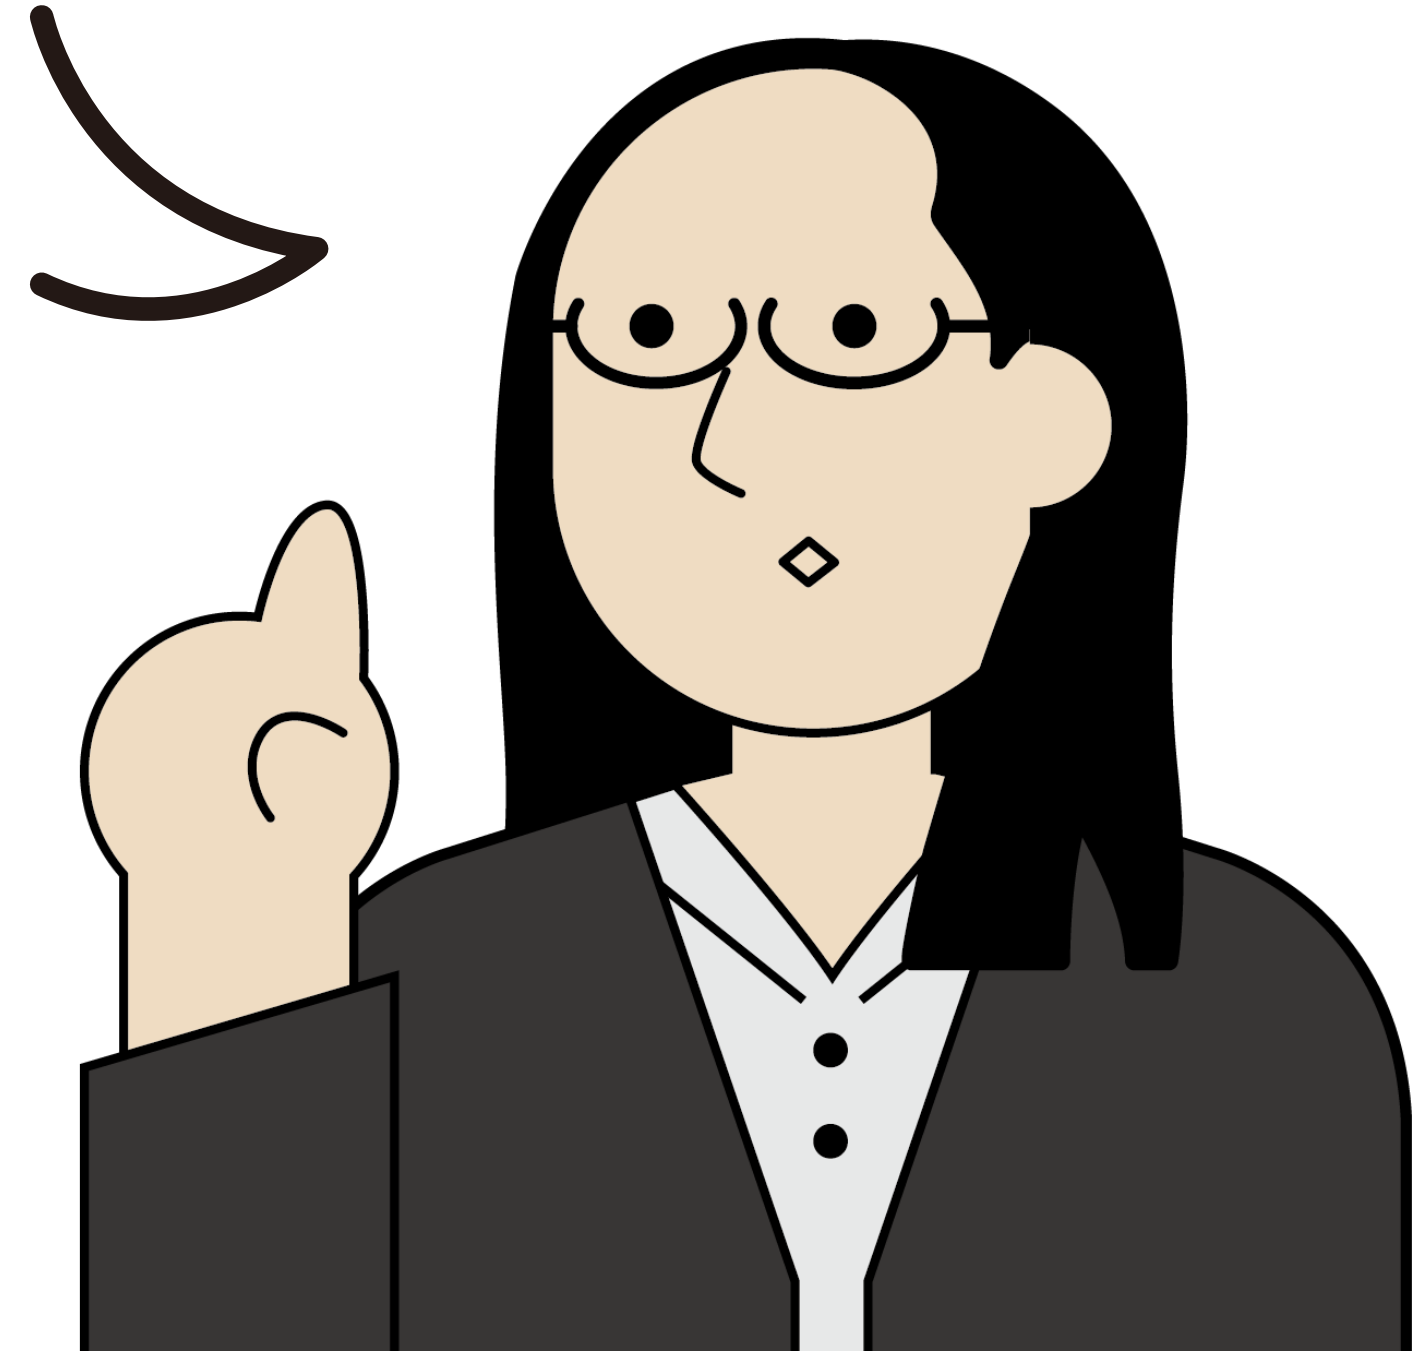

而是填空题！」

it's a fill-in-the-blank!"

- 唐鳳 Tang Feng, Minister
of Digital Affairs of Taiwan.

生理性別或許難以改變，但性別認同是可以的。
性別認同跳脫生理性別的框架，更能展現個人意志。

Biological sex may be difficult to change, but gender identity can. Gender identity transcends the confines of biological sex and better reflects individual will!

性別光譜 數位身分證介面

性別認同設定介面

Digital ID Card – Gender Identity Spectrum
Configuration Interface

提供性別認同光譜軸，選擇性別色彩

Introducing the concept of gender identity spectrum to allow individuals to define themselves.

追溯機制讓民眾負責任地做出每個選擇

The traceability mechanism allows individuals to make each choice responsibly, preventing the emergence of social chaos.

提供選項設定資訊公開模式

Provide privacy setting options

若光譜軸上仍然沒有民眾想要的定位，可以自行定義選擇文字、符號或其他色彩，以呈現最貼近自己的性別認同。

If the spectrum axis still doesn't align with people's expectations for their identity, they can use text, symbols, or other colors through customizable options to represent the state that best reflects their personal identification.

導入性別認同光譜 數位身分證應用場景

After the implementation of gender identity spectrum, the digital ID card can be applied in the following scenarios:

商業應用 Business

Through the integration of technology, businesses can utilize the personal information provided by individuals to streamline information flows, enabling precise marketing and services. Online users can also simplify complex identity verification processes, speeding up online activities, whether it's for social welfare, civic voting, or business transactions, thus realizing digitization and expediting these processes.

提升實體商業服務體驗

透過科技導入，民眾只要攜帶綁定數位身份證之裝置，並開啟感測技術進入店家場域，經設定允許提供資訊的情況下，店家能夠感應裝置存取個人資訊。根據民眾提供資訊，串聯人流、金流相關數據，整合消費者行為分析，提供精準行銷，並給予更細膩的商業服務，持續優化民眾體驗。

數位身分驗證效率便民

利用科技媒介得即時更新符合現狀的個人狀態，簡化數位身份網路驗證步驟，取而代之的是社會福利、公民投票甚至商業活動等得以落實數位化，只需輸入識別碼或掃描生物特徵，即可快速完成登入、進行交易。申辦任何社群平台都可以應用，快速填入更新個人資訊，大幅簡化繁雜程序。

導入性別認同光譜 數位身分證應用場景

After the implementation of gender identity spectrum, the digital ID card can be applied in the following scenarios:

公私部門 Public and Private Sectors

Government and corporate organizations can take the lead in establishing a diverse-friendly workplace culture and providing the necessary support and assistance to diverse individuals. Additionally, gender-friendly guidelines can be formulated to ensure neutrality when exercising public authority and providing services, avoiding questioning of gender preferences. It's important to respect individual self-awareness and prevent recurring situations that make people uncomfortable and awkward.

提供更適切社福資源

政府與公司應帶頭建立多元友善的文化，對於不願透露性別認同的員工給予尊重，而對於自信展現自我的員工給於支持，根據其性別認同提供心理健康支援、性別轉變相關服務，以及鼓勵性別多樣性社群發展，使個人更容易獲得符合其性別認同的支持協助。

建立性別友善規範指引

在行使公權力執法盤查時，能避免質疑與偏見，若有搜身必要以性別認同欄位作為參考跟據，須尊重個人意願安排合適人員進行，保障其人格尊嚴。公私部門稱呼民眾時皆應避免預設立場與質疑性別傾向，並以性別認同欄位作為稱呼依據，避免發生尷尬或造成心理不適的場面。

導入性別認同光譜 數位身分證展望未來
